D1062 – Victory 6' Perforated Steel Bench, Traditional Edge, Surface Mount

6' perforated steel bench with back, traditional edge and surface mount legs

Material

The seat and back are made of 12-gauge perforated steel with a .56" diameter uniform hole pattern. The bench is 72.25" long and will support 200 lbs. per linear foot.

The supports and legs are made of 2.38" O.D. steel tubing. The legs feature 8" square plates with pre-drilled holes for surface mounting to prevent movement; mounting hardware not included.

Finish

Steel seat and back are protected by the patented Fusion Advantage™ finish. The plastisol coating has an average thickness of .125" and is encapsulated with a richly tinted, high performance powder coating that won't rust, fade, peel, chip, crack, mold or mildew. The finish has been tested to the requirements of ASTM E1354 and determined to be in compliance with California Uniform Fire Code 1103.2.1.4.2.

Fade-resistant, powder coated legs and under supports feature a state-of-the-art primer proven to prevent rusting. Treated components exceed the industry standard by 34% in testing by independent sources.

Color

See website or sales representative for color choices.

Assembly

The bench requires some assembly. Stainless steel assembly hardware is included.

Maintenance

The product is virtually maintenance-free and requires only periodic cleaning with a sponge and a solution of mild detergent and water to remove surface dirt. Do not clean with solvent or petroleum base products.

Warranty

20-year limited structural warranty with 7-year finish warranty against fading from date of purchase. See full details on multi-year warranties for components at www.anovafurnishings.com/warranty.aspx.
