

PBM4B — Recycled Plastic 4' Contour Bench with Black Frame/Legs

4' contour bench with recycled plastic planks and steel frame/legs in portable, surface mount or inground mount.

Material

The 4' contour bench is composed of 2.38" O.D. steel tubular legs with formed steel feet and 2.50" x 3.50" recycled plastic planks for the seat and back. The bench is 48" long and will support 200 lbs. per linear foot.

The bench is designed to be portable for flexibility in placement or surface mounted using pre-drilled holes in feet to prevent movement. Mounting hardware is not included. The bench is also available without the feet for inground mounting.

The planks are made of 95% recycled content by weight and are impervious to moisture and corrosion, do not require the application of sealants or preservatives, and will never need painting or staining throughout the product's life.

Finish

Fade-resistant, powder coated steel features a state-of-the-art primer proven to prevent rusting. Treated components exceed the industry standard by 34% in testing by independent sources.

Color

See website or sales representative for color choices.

Assembly

The bench requires some assembly. Mounting the inground model requires site preparation and construction of a temporary support.

Maintenance

The product is virtually maintenance-free and requires only periodic cleaning with a sponge and a solution of mild detergent and water to remove surface dirt. Do not clean with solvent or petroleum base products.

Warranty

20-year limited structural warranty on recycled plastic from the date of purchase. See full details on multi-year warranties for components at www.anovafurnishings.com/warranty.aspx.
